Stay home, stay safe, stay healthy

Plum Creek Medical Group is **OPEN** and ready to serve you! We have taken extra steps to ensure that you receive treatment in a safe environment. Whether it be in our clinic or from the comfort of your home.

At the clinic we are still providing:

- Routine medical care
- Lab services -x-rays

But in order to keep you safe at home we now provide **Telehealth**, same quality care from the comfort of your couch.

The doctor will see you now...
from the comfort of your home

Telehealth is an online, live doctor's visit that lets you interact with your provider using your computer, tablet or phone. This service is usually covered by most insurance plans including Medicare. *It's just like your regular appointment, but from your home!*

Questions or to schedule your telehealth appointment call our office at (308) 324-6386

Welcome to *Better* Health Care
